

Clearly, AI

FREE STARTER KIT

10 things you can do with AI *today*.

No tech skills required. No jargon. Just 10 practical things you can try right now — in plain English.

Works with **ChatGPT** · **Claude** · **Gemini** · and most AI tools

For each item below, you'll find a **plain-English explanation** of what it does and a **ready-to-use prompt** you can copy and paste directly into any AI tool. Start anywhere. There's no wrong order.

1

Write any email in 30 seconds

Give AI the key points you want to cover and it will write a clear, polished email for you — ready to copy, tweak, and send. Works for work emails, follow-ups, complaints, thank-you notes, and more.

TRY THIS →

"Write a friendly follow-up email to a client named John. We met last week and discussed working together on a marketing project. Keep it warm, short, and professional."

3

Brainstorm ideas — on demand

AI never runs dry on ideas. Gift ideas, business names, dinner themes, marketing angles, vacation spots — describe what you're looking for and get a dozen options immediately.

TRY THIS →

"Give me 10 creative names for a small bakery that specializes in gluten-free treats. Warm, friendly, memorable. Nothing too cutesy."

4

Get a straight answer to any question

Skip the search results, the ads, and the ten tabs you have to open. Ask AI your question directly and get a clear, useful answer — you can even ask follow-up questions to dig deeper.

TRY THIS →

"Explain what a Roth IRA is and whether it makes sense for someone in their 40s. Plain English only — no financial jargon."

5

Proofread and polish your writing

Paste anything you've written — an email, a bio, a review, a cover letter — and ask AI to clean it up, fix mistakes, and improve the tone. You keep your voice; it just makes it shine.

TRY THIS →

"Proofread this and make it sound more professional. Fix any grammar issues and tighten the language, but keep my voice: [paste your text]"

6

Write a week of social media posts

Tell AI about your business and what you want to say, and get a full week of ready-to-post content — captions, hashtag suggestions, and all. Works for Instagram, Facebook, LinkedIn, and more.

TRY THIS →

"Write 5 Instagram posts for a local coffee shop called Morning Grounds. Friendly, casual tone. Mix of behind-the-scenes moments, product spotlights, and community vibes."

7

Plan a trip, event, or project

Give AI your dates, budget, and what you care about — and get a complete, practical plan. Itineraries, to-do lists, party timelines, project outlines. It handles the thinking so you don't have to.

TRY THIS →

"Plan a 4-day trip to Nashville for two people. We like live music, good food, and history. Budget around \$1,500 total. Give me a day-by-day itinerary."

8

Decode confusing documents

Medical reports, insurance policies, legal contracts, HOA rules — paste a confusing paragraph and ask AI to explain it in plain English. You'll actually understand what you signed.

TRY THIS →

"Here's a paragraph from my insurance policy: [paste the text]. What does this actually mean in plain English? What should I know or watch out for?"

9

Turn what's in your fridge into dinner

Tell AI what ingredients you have and it will generate a full recipe — including steps, tips, and even substitutions if you're missing something. No more "I don't know what to make."

TRY THIS →

"I have chicken thighs, garlic, lemons, olive oil, and some fresh rosemary. What can I make for dinner tonight? Give me a simple, step-by-step recipe."

10

Write your bio, intro, or professional summary

Tell AI who you are and what you do, and get a polished, professional bio in seconds. Use it for LinkedIn, a website, a speaking introduction — wherever you need to put your best foot forward.

TRY THIS →

"Write a short professional bio for me. I'm a 52-year-old office manager with 20 years in healthcare administration. I'm known for being organized, warm, and great with people. Keep it to 3–4 sentences."

A few tips to make it *work even better*.

Be specific

The more detail you give AI, the better the result. Include your name, audience, tone, and any constraints. Treat it like briefing a helpful assistant.

Keep the conversation going

Not quite right? Just say so. "Make it shorter," "make it warmer," or "try a different angle" all work. You can go back and forth as many times as you want.

Always review before you use it

AI is a starting point, not a final draft. Read it through, make it your own, and fact-check anything important. You're still in charge.

Ready to go deeper?

Clearly, AI is a friendly school for everyday people who want to use AI confidently — no tech background required.
